PROFESSIONAL SUMMARY

Senior Mobile Engineer with 5+ years of experience building Android and iOS apps in Flutter and in native Kotlin and Swift. Currently works on the customer and driver apps at Telgani, a Saudi car rental platform, across native code, Kotlin Multiplatform, and Flutter. Has shipped 15+ production apps in mobility, fleet tracking, logistics, property tech, and social, including mobile lead roles on two European logistics products and a team of 5 developers. Strong in background location tracking, Arabic RTL and multilingual apps, payments and subscriptions, testing, and App Store / Google Play releases. Cut one production app's crash rate from 55% to 4%.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Kotlin (Android), Swift (iOS), Kotlin Multiplatform (KMP), Flutter Web (PWA), Android Studio, Xcode, Gradle, CocoaPods

Architecture & state: Clean Architecture, MVVM, MVC, SOLID, BLoC, Cubit, Riverpod, Provider, GetX

Location & real-time: Google Maps, live GPS tracking, background location tracking, geofencing, route management, Socket.IO, WebSockets

Payments & monetization: Stripe, Apple Pay, Google Pay, RevenueCat, App Store and Google Play subscriptions, in-app purchases

Localization: Arabic (RTL), English, Dutch, multi-language apps

APIs & data: REST APIs, GraphQL, Firebase (Auth, Firestore, Realtime Database, FCM), OAuth / social login, Dio, Retrofit, Hive, SQLite, secure storage

Platform features: Deep linking, push notifications, OCR, maps, social login

Quality & testing: Unit testing, integration testing, A/B testing, Crashlytics, Firebase Analytics, performance profiling, data privacy

Delivery: Git, GitHub, GitLab, GitHub Actions, Fastlane, CI/CD, TestFlight, App Store and Google Play releases, staged rollouts, Jira, YouTrack, Postman

AI-assisted development: Claude Code, OpenAI Codex, agentic AI coding workflows

PROFESSIONAL EXPERIENCE

Senior Mobile App Developer | Telgani
Sep 2026 - Present

Riyadh, Saudi Arabia | Saudi car rental platform with customer and driver mobile apps.

- Build features for Telgani's car rental customer app and driver app across native Android (Kotlin), native iOS (Swift), a shared Kotlin Multiplatform module, and Flutter.
- Implemented deep linking on Android and iOS so external links open the right screen inside the app.
- Working on the app revamp ahead of upcoming releases, using Gradle, CocoaPods, and GitLab.

Lead Mobile Developer | Nedsoft IT Solutions
Nov 2025 - Aug 2026

Dubai, UAE (Remote)

- Led mobile development of DriveWatch, a European fleet dashcam platform, and Pakket2Go, a Dutch courier operations app, on iOS and Android.
- Built background location tracking that keeps reporting driver position, routes, and delivery status while the app runs in the background.
- Delivered DriveWatch features including live GPS tracking, ADAS road-detection alerts, driver monitoring, maintenance workflows, and remote configuration.
- Delivered Pakket2Go route management, navigation, delivery status, earnings, and proof-of-delivery workflows.
- Localized both apps in Arabic (RTL), Dutch, and English.

Mobile Team Lead | Chameleon Ideas Global
Feb 2025 - Nov 2025

Remote

- Led a team of 5 mobile developers, covering architecture, sprint planning, code reviews, mentoring, QA coordination, and release readiness.
- Ran client meetings to gather requirements, proposed technical solutions, and presented completed apps to clients at handover.
- Cut the Octagon app's crash rate from 55% to 4% by tracing and fixing crash-prone flows with Crashlytics.
- Delivered 9 mobile apps and built Flutter Web progressive web apps (PWA); apps include Property Kare (Canadian home-maintenance and emergency app), Tranzio and Tranzio Driver, DIY Learners, Octagon, Cutsy, and Cutsy Barber.
- Standardized reusable components, architecture boundaries, and state management across GetX, Provider, Riverpod, and BLoC projects.
- Turned client requirements into technical specs and API contracts; owned signing, provisioning, TestFlight, staged rollouts, and production hotfixes.

Flutter Developer | Crystallite Pakistan (Pvt.) Limited
Feb 2024 - Dec 2024

Karachi, Pakistan

- Built and maintained Flutter apps using Firebase, REST APIs, reusable UI components, and scalable state management.
- Turned Figma designs into responsive interfaces; integrated Firebase Auth, Firestore, Realtime Database, FCM, deep links, Google Maps, and live tracking.
- Improved release stability by profiling performance, fixing crash-prone flows, and monitoring production with Crashlytics and Analytics.

Software Engineer (Flutter) | Revstack
Feb 2023 - Jan 2024

Karachi, Pakistan

- Delivered production features with REST APIs, third-party SDKs, OAuth and social login, maps, payments, in-app purchases, live tracking, and Socket.IO real-time updates.
- Owned App Store and Google Play releases, including signing, store metadata, review submissions, TestFlight builds, and post-launch monitoring.

Software Engineer (Flutter) | Jumppace Pvt. Ltd.
Jun 2021 - Feb 2023

Karachi, Pakistan

- Built and shipped Flutter apps for local and international clients in e-commerce, restaurants, employee management, B2B, and utilities.
- Implemented authentication, API integrations, local storage, push notifications, payments, and responsive UIs from Figma and Adobe XD designs.

SELECTED APPS

- **Property Kare:** Canadian home-maintenance and emergency-management app with guides, alerts, and restoration-support flows.
- **DriveWatch:** European fleet dashcam platform with live GPS tracking, ADAS road detection, driver monitoring, and alerts.
- **Otobucks:** UAE car repair marketplace with multi-workshop quotes, online price negotiation, service booking, chat, and reward points.
- **Swish:** basketball performance tracker with shot analytics, player statistics, and gamified training.

EDUCATION

Bachelor of Science in Computer Science | Muhammad Ali Jinnah University, Karachi, Pakistan
2022
